

Customer Support Knowledge Base

This document is a sample knowledge base designed for a Retrieval-Augmented Generation (RAG) Customer Support Assistant. It includes FAQs, troubleshooting guides, billing policies, password reset instructions, escalation rules, and customer service workflows.

1. Account Management

Q: How do I reset my password?

A: Users can reset their password by clicking the 'Forgot Password' option on the login page. A password reset link will be sent to the registered email address.

Q: How do I update my email address?

A: Navigate to Profile Settings → Account Information → Update Email. Verification through OTP is required.

Q: How do I deactivate my account?

A: Users may request account deactivation through the support portal. The request will be processed within 48 hours.

2. Billing and Payments

Q: What payment methods are accepted?

A: The platform supports credit cards, debit cards, UPI, and net banking.

Q: Why was my payment declined?

A: Payments may fail due to insufficient balance, expired cards, bank restrictions, or temporary payment gateway issues.

Q: How do I request a refund?

A: Refund requests can be raised within 7 days of purchase. Approved refunds are processed within 5–7 business days.

3. Technical Support

Q: The application is not loading. What should I do?

A: Clear browser cache, restart the browser, and ensure a stable internet connection. If the issue persists, contact technical support.

Q: How do I report a bug?

A: Users can report bugs through the Help Center by including screenshots and error messages.

Q: Why am I seeing a server error?

A: Server errors may occur during maintenance windows or due to temporary outages.

4. Subscription Policies

Q: Can I cancel my subscription anytime?

A: Yes, users can cancel subscriptions from the Billing section.

Q: Will I get charged after cancellation?

A: No future billing occurs after cancellation, but existing billing cycles remain active.

Q: Do you provide trial subscriptions?

A: A 7-day free trial is available for premium plans.

5. Escalation Guidelines

Q: When should a query be escalated to a human agent?

A: Escalation is required for legal issues, payment disputes, compliance concerns, or when the AI confidence score is below threshold.

Q: What happens after escalation?

A: A support agent reviews the conversation and responds manually.

Q: How are escalated tickets prioritized?

A: Priority depends on issue severity, customer tier, and business impact.

Support Workflow Overview

The customer support assistant follows the below workflow:

- 1. User submits query
- 2. Query embeddings are generated
- 3. ChromaDB retrieves relevant chunks
- 4. LLM generates contextual answer
- 5. Confidence evaluation is performed
- 6. Queries with low confidence are escalated to humans

Component	Technology
Frontend	Streamlit
Workflow Engine	LangGraph
Embeddings	Sentence Transformers
Vector Database	ChromaDB
LLM	LLaMA3 / GPT Models
